

Snowy 2.0 Work Notification

Talbingo | October 2020

Temporary activities near boat ramp

Thursday, 22 October

A barge installing the underwater communication cable across the Talbingo Reservoir will be resupplied in October.

Anchor blocks to secure the underwater cable will be delivered to the storage compound on 22 October. A forklift will then load these blocks onto the barge via the boat ramp.

This activity is not expected to disrupt access to the boat ramp and should be completed in the morning.

The barge will have a 30m exclusion zone and may operate 24/7.

Future Generation would like to thank you for your patience while we carry out this important work.
