

Snowy 2.0 Work Notification

Talbingo | December 2020

- Activity:** Completing the installation of an underwater communication cable
- Location:** Talbingo boat ramp and car park, Talbingo Reservoir, Yarrangobilly River and Tumut River
- Timing:** Intermittent disruptions from 1 to 18 December 2020

The installation of an underwater communication cable at Talbingo Reservoir and into the project site is nearing completion.

The remaining work and demobilising from site will involve some temporary disruptions that will affect access to the Talbingo boat ramp.

Work will involve

- Deliveries to the temporary compound in the car park adjacent to the boat ramp.
- Temporary crane operations in the car park to decommission the barge and demobilise the temporary compound.
- Vessel operations along Talbingo Reservoir into the project worksite at Lobs Hole to complete the installation of a communication cable.
- A range of plant and equipment will be used such as a 20 tonne franna, 100 tonne mobile crane, barge, light vehicles and semi-trailers delivering equipment and material to & from site.

The barge will be decommissioned, and the temporary compound demobilised over a 10-day period in December and this will involve some temporary restrictions to the boat ramp.

What to expect

This scope of work is expected to finish before the start of school holidays to minimise disruption for the local community, local businesses and tourism, and to minimise impact to the environment.

- Decommissioning the barge will involve some temporary restrictions to the boat ramp for crane operations at the following times:
 - **Friday 4 December – partial day closure**
 - **Tuesday 8 December – full day closure**
 - **Wednesday 9 December – full day closure**
- Demobilising the compound in the car park will start from 2 December.
- Traffic control will be in place during periods of restricted access to the boat ramp. Access to the boat ramp will be maintained at all other times.
- The barge will have a 30m exclusion zone and may operate 24/7. Boat users, water skiers and swimmers will need to observe the 30m exclusion zone when the barge is in operation.

Thank you for your continued patience while we complete this work.
