

## Snowy 2.0 Work Notification

**Polo Flat | December 2020**

**Activity:** Construction activities at Polo Flat Segment Factory site

**Location:** Polo Flat Road and Carlaminda Road, Cooma

**Timing:** 7am-6pm Mondays to Saturdays from 2 December 2020 to 28 February 2021

The Segment Factory at Polo Flat is required to manufacture precast concrete segments to line the tunnels being excavated for Snowy 2.0. The factory will operate to facilitate the production of precast concrete tunnel segments that will be transported to the Snowy 2.0 project sites at Lobs Hole and Tantangara.

### Work will involve

Construction of the segment factory & batching plant and fit out of the facility is continuing at Polo Flat, and will involve the following activities:

- Completing concrete foundations for factory and batching plant
- Completing internal fencing
- Sealing internal roads
- Erecting structural steel for factory building and ancillary buildings – workshops, laboratory, amenities blocks, weigh bridge, truck wash and fuel bay
- Fitting out plant and equipment inside factory building, batching plant and ancillary buildings
- Installing services and utilities
- Manual production of concrete segments
- Constructing a new external access road and intersection adjoining Polo Flat Road

Work may involve a range of plant and equipment such as excavators, bulldozers, scrapers, rock breakers, jack hammers, concrete trucks and pumps, concrete helicopters, flood lights, vacuum excavation trucks, water carts, cranes, traffic control vehicles, and semi-trailers delivering material to site.

### What to expect

- The work is being planned to ensure minimal disruption for the local residents and businesses, and to minimise impact to the environment.
- Traffic control will be in place during some short periods to help manage access on Polo Flat Road. Access to Polo Flat Road and Carlaminda Road will be maintained at all times.
- You may experience some noise and vibration during this work. Respite periods will be provided for high noise work.
- Where required, any dust generating activities will be watered down.
- Initial operations at the segment factory will involve manual production of concrete segments.

Construction of the segment factory and batching plant is expected to be substantially completed during this notified period. Out of Hours Work that may be required will be notified separately. Periodic updates may be issued as work progresses. The program of work may be subject to change based on weather, design, unexpected finds and scheduling requirements.

### For more information

Thank you for your understanding while we carry out this work.
